Career Objective

Results-driven Backend Developer with **2 years of experience** in building scalable and maintainable server-side applications using **Node.js**, **Express.js**, and **NestJS**. Strong in **REST API design**, **database modeling**, and integrating third-party services. Adept in the full software development lifecycle and always eager to learn and adapt to new technologies

Experience

Backend Developer (Full-time Remote, Iraq)

(Alkawkab_ALdori Company)

Long-Term Freelance Project - *June 2024 - September 2024*

I am responsible for developing backend solutions for beauty centers and cosmetics. I have implemented a comprehensive system for managing beauty center services, product offers, and bookings using Node.js and NestJS, with PostgreSQL as the database. The project includes admin and user roles, appointment scheduling, service/product management, and advanced offer handling for both products and services\

Education Platform (Freelance)

(Februar2024 _April 2024)

Designed and developed a scalable backend for an education system using Node.js and MongoDB.

Implemented JWT authentication with role-based access control for multiple user types.

Applied strict data validation and error handling to ensure data integrity.

Built modular features covering user management, courses, exams, attendance, and reviews. [GitHub-Link](#)

Ecommerce project (Freelance)

(November 2023 – Februar-2024)

The e-commerce API built with Node.js and MongoDB offers a comprehensive set of features that cover user management, product management, cart management, order management, brand management, review management, coupon management, error handling, , and it integrated with the PayPal gateway ,and more. [GitHub-Link](#)

Learning Management System

The school management system API developed using Node.js Express and MongoDB.

is a comprehensive solution for managing various aspects of a school. It provides administrators teachers and students with the necessary tools to streamline administrative tasks enhance communication and ensure efficient management of academic processes . [GitHub-Link](#)

Education

- Faculty of Computers and Artificial Intelligence (2019 – 2023)
 - Bachelor's degree in computer science
 - Backend Diploma from Route Academy
-

Technical Skills

Languages: JavaScript, TypeScript

Frameworks/Technologies: Node.js, Express.js, NestJS, Mongoose

Databases: MongoDB, MySQL

APIs: REST-API, Socket.IO

Tools: Git, GitHub, Postman, Docker (Basic)

Concepts: MVC Architecture, Authentication, Authorization, Payment Integration

Interpersonal Skills

Flexible in learning new technologies

Excellent communication and collaboration skills

Team Work | excellent research skills

Languages

- Arabic
- English
